WHAT IS MISOMIFE-FEM® COMBO?

- **Mifepristone** 200mg (1 tablet) stops the action of the hormone (progesterone) that sustains pregnancy. This causes the embryo to detach from uterus (womb) and the pregnancy to stop growing.
- **Misoprostol** 800mcg (4 tablets) causes contraction, to push out the content of the womb.

- Miscarriage Management Kit

**TRAINING TOOLS**
- Pelvic Model
How to use MISOMIFE-FEM® Combo?

Day 1

Swallow mifepristone tablet with water
Patient should have someone with them for support. They should eat something light (e.g. crackers) or take an anti-emetic drug to prevent vomiting.

Wait for 24-48 hours after taking mifepristone tablet
Most women do not feel any symptom during this period. Some may feel like vomiting or have slight bleeding.

Day 2

Place 4 tablets of misoprostol between your cheek and bottom gums for 30mn
After 30 minutes, swallow any remainers with water
Patient should be in a comfortable place to rest. Patient is likely to experience cramps and bleeding, which may be painful, and to pass clots of blood.

Most women feel better after 24 hours.
